SCOPE OF THE JOURNAL

The International Journal of Ambient Systems and applications is a quarterly open access peer-reviewed journal that publishes articles which contribute new results in all areas of ambient Systems. The journal focuses on all technical and practical aspects of ambient Systems, networks, technologies and applications. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on advanced ambient Systems and establishing new collaborations in these areas.

Topics of Interest

- Agent Systems, Intelligent Computing and Applications
- Autonomic Networks and Communications
- Cognitive wireless sensor network
- Context awareness, social sensing and inference
- Data Management
- Dependable, Reliable and Autonomic Computing
- Embedded Systems and Software
- Emerging Networking, Tracking and Sensing Technologies
- Ergonomics and product prototyping
- Healthcare Systems
- Intelligent and self-organizing transportation networks & services
- Multimedia and Social Computing
- Multimodal Interfaces
- Service and Semantic Computing
- Service Oriented Computing for Systems & Applications
- Smart Environments and Applications
- Systems Security and Privacy
- Systems Software Engineering
