SCOPE OF THE JOURNAL

The International Journal of Control Theory and Computer Modelling (IJCTCM) is a bi-monthly open access peer-reviewed journal that publishes articles which contribute new results in all areas of Control Theory and Computer Modeling. The journal focuses on all technical and practical aspects of Control Theory and Computer Modelling. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on advanced control engineering and modeling concepts and establishing new collaborations in these areas.

Authors are solicited to contribute to this journal by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in Control Theory and Computer Modeling.

Topics of interest include, but are not limited to, the following

- Control theory
- Linear and nonlinear control systems
- Optimization and optimal control
- Robust control
- Adaptive control
- Digital control
- Feedback control
- Sliding mode control
- Soft computing and control
- Process control and instrumentation
- Fault detection and isolation
- Model predictive control
- Stochastic control and filtering
- Systems and automation
- Networked control systems

Paper Submission & Manuscript preparation Guide

Paper Submission

Authors are invited to submit papers for this journal through Email: ijcetcmjournal@yahoo.com or ijcetcmjournal@airccse.org Submissions must be original and should not have been published previously or be under consideration for publication while being evaluated for this Journal.

Review Process

Submissions are accepted for review with the understanding that the same work has been neither submitted to, nor published in, another publication. Simultaneous submission to other publications will result in immediate rejection of the paper. Papers are not within the journal scope will be rejected immediately after the pre review process.

All manuscripts will be subject to a well established, fair, unbiased peer review and refereeing procedure, and are considered on the basis of their significance, novelty and usefulness to the Journals readership. The reviewing structure will always ensure the anonymity of the referees & it will be reviewed by 3 experts in the field. The review output will be one of the following decisions:

1. Accept
2. Accept with minor changes
3. weak Accept with major changes
4. Reject

The review process may take approximately two ~three months to be completed. The Editor reserves the right to reject a paper if it does not meet the aims and scope of the journal, it is not revised well.
