

The Third International workshop on Grid Computing (GridCom-2011)

<http://airccse.org/gridcom2011/gridcom2011.html>
(In Conjunction with WiMo - 2011) June 26 ~ 28, 2011
Venue : , Ankara, Turkey

Call for Papers

Service-oriented computing is a popular design methodology for large scale business computing systems. Grid computing enables the sharing of distributed computing and data resources such as processing, networking and storage capacity to create a cohesive resource environment for executing distributed applications in service-oriented computing. Grid computing represents more business-oriented orchestration of pretty homogeneous and powerful distributed computing resources to optimize the execution of time consuming process as well. Grid computing have received a significant and sustained research interest in terms of designing and deploying large scale and high performance computational in e-Science and businesses. The objective of the meeting is to serve as both the premier venue for presenting foremost research results in the area and as a forum for introducing and exploring new concepts.

Topic of Interest

Authors are solicited to contribute to the workshop by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the following areas, but are not limited to

<ul style="list-style-type: none"> ○ Applications, including eScience and eBusiness Applications ○ Architectures and Fabrics ○ Distributed and Large-Scale Data Access and Management ○ Core Grid Infrastructure ○ Peer to Peer Protocols in Grid Computing ○ Network Support for Grid Computing ○ Monitoring, Management and Organization Tools ○ Networking and Security ○ Performance Measurement and Modelling ○ Metadata, Ontology, and Provenance ○ Middleware and toolkits for Grid Computing ○ Computing and Programming Models ○ Programming Tools and Environments 	<ul style="list-style-type: none"> ○ Distributed Problem Solving ○ Creation and Management of Virtual Enterprises and Organizations ○ Information Services ○ Resource Management, Scheduling, and Runtime Environments ○ Scientific, Industrial and Social Implications ○ QoS and SLA Negotiation ○ Grid Economy and Business Models ○ Autonomic and Utility Computing on Global Grids ○ Cluster and Grid Integration Issues ○ Web Services, Semantic Grid and Web 2.0 ○ Grid related Applications
---	---

Paper submission

Authors are invited to submit papers for the workshop through ([Microsoft Submission System](#)) by January 30, 2011(for more details visit <http://airccse.org/gridcom2011/gridcom2011.html>). Submissions must be original and should not have been published previously or be under consideration for publication while being evaluated for this workshop. The workshop proceedings will be published by LNCS series along with the main conference proceedings (WiMo 2011). Selected papers from, after further revisions, will be published in an international journal (Pending).

[International Journal of Wireless & Mobile Networks \(IJWMN\)](#)
[International journal of Computer Networks & Communications \(IJCNC\)](#)
[International journal of Network Security & Its Applications \(IJNSA\)](#)
[International journal of computer science & information Technology \(IJSIT\)](#)
[International Journal of Database Management Systems \(IJDMS \)](#)
[Computer Science & Engineering: An International Journal \(CSEIJ\)](#)

Important Dates

Submission Deadline: January 30, 2011
Authors Notification: February 25, 2011
Final Manuscript Due: March 25, 2011
